

EDM APPLICATION ENGINEER

Join NCMT as an EDM Applications Engineer – Shape Advanced Machining Solutions

Are you passionate about engineering precision and delivering real-world results? We are looking for an **Applications Engineer** to join our EDM (Electrical Discharge Machining) team at NCMT.

This is a customer-facing, technically varied role where you will be involved in both pre- and post-sales activities—ranging from time studies and machining demonstrations to delivering full turnkey packages, training and on-site support.

NCMT is proud to represent leading Japanese machine tool manufacturers such as Makino and Okuma. As part of our team, you will be based primarily at our Technical Centre in Coventry, with travel across the UK, Europe, and occasionally further afield.

What you'll be doing:

- Delivering turnkey EDM solutions to customers
- Developing machining strategies and CNC programmes
- Conducting customer training on machine operation, programming, and maintenance
- Supporting the sales team with technical proposals and time studies
- Running test cuts, demos, and exhibitions in our Coventry showroom
- Travelling to customer sites and trade shows when required

About you

You will have a strong engineering background and experience working in a machine tool environment. You will be comfortable working independently on complex technical projects while also contributing effectively as part of a wider engineering team.

The ideal candidate will have:

- Hands-on experience in EDM applications or high-precision machining
- Confidence working independently and as part of a collaborative team
- Strong communication skills and attention to detail
- A passion for solving complex engineering challenges
- Willingness to travel nationally and occasionally internationally

JOB ADVERT

Location and travel

The role is primarily based at NCMT's Technical Centre in Coventry. However, there will be a requirement for extensive travel throughout the UK and Europe to support turnkey projects through to completion.

What we offer

In return, you will join a company at the forefront of machine tool technology, working with world-class equipment and highly skilled colleagues. This is a challenging and rewarding role offering excellent technical exposure and long-term development opportunities.

The package includes:

- An attractive salary, dependent on experience
- Private healthcare
- Pension scheme

If you are looking to progress your engineering career within a technically advanced and customer-focused environment, we would welcome your application.
